

# ANTI-FREEZE VALVE

## PRODUCT DESCRIPTION

- Designed to prevent ice from forming in the heat pump circuit
- Discharges system water when temperature drops to 3°C
- Two valves are required to be installed outside. One on the flow and one on the return
- Matching insulation jacket included
- Anti-freeze valves eliminate the need to add expensive glycol to the heating system
- 1 year warranty as standard
- Stocked by Alto Energy and available for next day delivery

## TECHNICAL SPECIFICATION

Product	<b>ZERO001</b>
Max Inlet Pressure (static)	<b>10 Bar</b>
Medium	<b>Water</b>
Sensitivity	<b>+/-1°C</b>
Opening Temperature	<b>3°C</b>
Closing Temperature	<b>4°C</b>
Valve Body	<b>Brass</b>
Spring	<b>Stainless steel</b>
Internal Seals	<b>EPDM PEROX</b>
Internal Parts	<b>Brass</b>
