Installation Date:

August 2018

Property Type:

Barn Conversion

Product Installed:

2x 11kW Ecodan

Distribution System:

Underfloor Heating

Lifetime RHI Returns:

£10,475

Moving away from oil; the Mitsubishi Ultra Quiet Ecodan was a perfect fit for this barn conversion in Northamptonshire.

With an aim to provide heat and hot water to the property in a cost effective and eco friendly way, Mr Riches from Northamptonshire decided to invest in an air source heat pump system to do just that. Uncertainty of future oil prices, carbon reduction and Government grants were all reasons prompting Mr Riches to investigate heat pump technology. From this installation, he is eligible to claim just shy of £10,500 from the Government's Renewable Heat Incentive (RHI).

Mitsubishi are the UK's market leader for air source heat pumps. The Ultra Quiet Ecodan is one of the quietest heat pumps currently available on the UK market. Our Business Solutions Partner status with Mitsubishi shows the credit in Alto Energy's design, supply and commissioning service, and enables us to provide a 5 year warranty as standard on all of our installations.

Customer Q & A

How have you found living with your system?

"Generally looks after itself. Settings were altered during 1st service last August."

What made you choose Alto Energy to provide your system?

"Recommended by one of their installation partners."

What has the service been like from Alto Energy?

"Very good and I would recommend them."
